CONTENTS

SAFETY AND PRECAUTIONS

We recommend that you read this chapter carefully before use.

⬤ CONDITIONS OF USE:

Switch the phone off before boarding an aircraft. Use could lead to legal action against the user. Switch the phone off when in health care facilities except in areas specified. Like many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices in their proximity. Persons with a medical device (such as a pacemaker, hearing aid, insulin pump) should not carry the phone in a place close to the device. When placing or receiving a call, persons with a pacemaker or hearing aid should use the ear on the opposite side to the device.

Switch your phone off when near gas or flammable liquids. Strictly obey all signs and instructions when in a fuel depot or chemical plant, at a refuelling point (service station) or in any potentially explosive atmosphere. Do not let small children use the phone without supervision. Do not attempt to open or repair it yourself. Use only the batteries, battery chargers and accessories approved by the manufacturer. The manufacturer disclaims any liability for damage caused by use of other batteries, chargers or accessories. Switch your phone off before removing the battery. Do not expose the phone to unfavorable environmental conditions (humidity, rain, ingress of liquid, dust, sea air, etc.). Outside the manufacturer's recommended operating temperature range (-20° C to +55° C), the legibility of the phone's display may be impaired, though this is temporary.

⬤ ENVIRONMENT:

Do not attempt to open the battery because it contains chemical substances. Do not dispose of used batteries in household waste. Batteries must be disposed of in accordance with locally applicable environmental legislation.

⬤ TRAFFIC SAFETY:

Remember to always check whether local legislation allows operation of a mobile phone while driving a vehicle. It is vital to connect the phone to an external antenna when it is used in a vehicle. Electromagnetic waves may otherwise interfere with the vehicle electronics. Check that the antenna is mounted and located away from the driver and passengers or separated from them by a metal screen (e.g. car roof). We recommend that you park your car before using the phone. However if you intend to use your phone while driving, you must use it connected to the Alcatel Car Kit accessory. Check with your car dealer or car manufacturer that the car's electronic systems (anti-lock brakes (ABS), airbag) are adequately shielded from mobile phone RF energy. Always avoid placing the phone on the dashboard.

⬤ GENERAL INFORMATION:

As with all radio transceivers, your mobile phone emits electromagnetic waves. This phone conforms to international regulations insofar as when used under normal conditions and in accordance with the instructions contained herein.
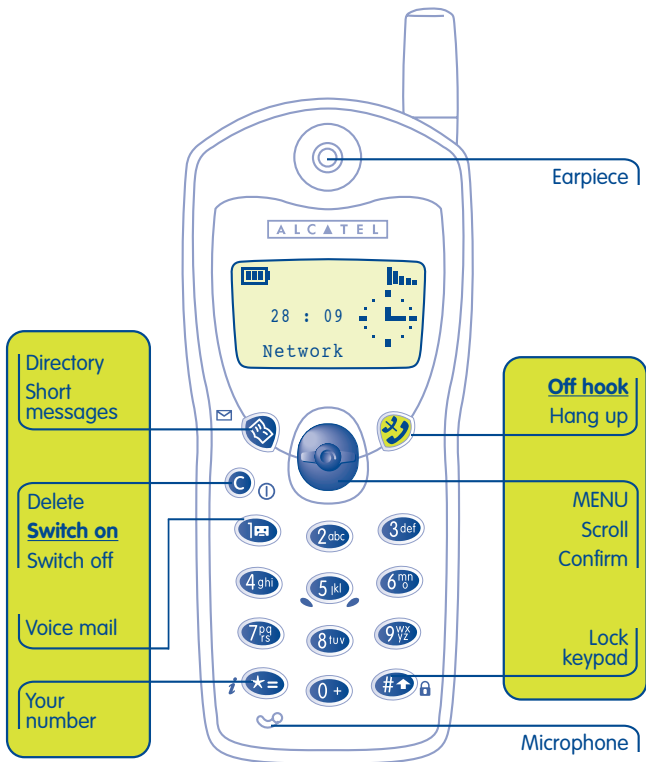

There has been speculation about the safety of mobile phones. Several expert groups belonging to or having been appointed by official national or international bodies have analyzed all the existing publications and, to this date, have concluded that there is a lack of evidence as to any credible or convincing hazardous effects of mobile phones on health. These studies have, in particular, focused on the fact that mobile handsets receive and emit electromagnetic waves via their antennae. Experts from such organizations as the European Commission and the International Commission on Non-Ionising Radiation Protection (ICNIRP) have established thresholds on a handset's emissions to the human body. The main measurement standard is known as SAR (Specific Absorption Rate). ALCATEL can formally state that all its GSM mobile phones generate a SAR that is significantly below these thresholds.

Furthermore, ALCATEL actively supports national and international research into this issue carried out by authoritative and independent organizations. If you still have concerns on this issue, you may use your mobile phone with a headset, or using the handsfree feature integrated in the phone and, while driving, with the car kit. The part numbers of these accessories can be found in Chapter 15 on page 60.

The manufacturer disclaims any liability for damage which may result as a consequence of improper use or use contrary to the instructions contained herein.

1.3 - CONVENTIONS USED IN THIS USER'S GUIDE

The following symbols are used in the text which follows:

Briefly press the scroll key in order to confirm an option.

Move the scroll key up or down in order to select an option.

Use the keypad keys to enter digits and letters.

*Icons and other illustrations shown in this User's Guide are for information only.

2 GETTING STARTED

2.1 - SIM CARD AND BATTERY

● INSERTING THE SIM CARD

You must insert your SIM card in order to use your phone.
Fit SIM card with chip facing downwards
Slide the SIM card into its compartment
Check that it is properly inserted

● FITTING THE BATTERY
Insert the battery
Fit the cover

Slide it into position

⬤ CHARGING THE BATTERY
Connect the battery charger

Wait for on-screen indicator to stop flashing
Disconnect the battery charger once charging is complete

A beep will sound when charging begins.

It takes a brief while before the charging indicator icon starts to flash.

The mains socket outlet must be close to the phone and easily accessible.

⬤ REMOVING THE BATTERY
Unclip and slide the cover.
Remove it
Remove the battery

> ❗ When you first use your phone you must charge the battery for approximately 3 hours.

2.2 - SWITCHING YOUR PHONE ON

Switch your phone on (long keypress) → Enter your PIN code → Confirm → Standby screen
> **!** If you do not know your PIN code, please contact your network operator. Do not leave your PIN code near your phone and store your card in a safe place when you are not using it.

You are prompted to enter the time and date, enter new data if necessary, then confirm by ⊙.

If cell broadcast messages are displayed, use the ⊙ key to browse through them in full or press the ⓒ key to return to the standby screen.

While the phone is searching for a network, **‹‹‹–›››** is displayed. (**???-???** is displayed if your SIM card is rejected by the network, in this case please contact your operator).

2.3 - SWITCHING YOUR PHONE OFF

From the standby screen, press the ⓒ① key (long keypress).

3 FIRST STEPS

In order to make or receive a call, you <u>must</u> switch your phone on.

3.1 - MAKING A CALL

Dial the number	Make the call	Talk	Hang up
		bla, bla, bla, bla, bla	
If you make a mistake, use the Ⓒ key to delete digits.

3.2 - RECEIVING A CALL

Incoming call	Take the call	Talk	Hang up
↘Call		bla, bla, bla, bla, bla	

> ! The caller's number is displayed if it is provided by the network (check the availability of this service with your operator).

3.3 - ACCESSING YOUR VOICE MAIL

The network provides the voice mail service to ensure that you do not miss any calls: it works like an answering machine which you can interrogate at any time.

Access voice mail
(long keypress)

Make
the call
If your operator's voice mail access number is not shown, dial the number that was supplied to you with your subscription. To later modify this number use the **"Numbers/Voicemail"** MENU option, page 45.

> To use your voice mail abroad, contact your operator before setting out on your trip.

3.4 - DISPLAYING YOUR NUMBER

You can display your own number by pressing the i ⊛ key (long keypress).

If your number is not displayed, enter it and confirm by pressing the ⊙ key.

To later modify it, see the **"Numbers/Your number"** MENU option, page 45.

3.5 - ACCESSING THE MENU AND SCROLLING

⬤ ACCESSING THE MENU

The MENU can be accessed from the standby screen by pressing the ⬤ key.

> Direct access to this function depends on your operator and the SIM card which you are using.

⬤ CHOOSING AN OPTION
List of options　　　Select an option

Confirm

⬤ RETURN TO PREVIOUS SCREEN

Press Ⓒ (short keypress).

⬤ RETURN TO STANDBY SCREEN

Press Ⓒ (long keypress).

3.6 - MENU STRUCTURE

Audio — Customise the sounds made by your phone (key beep, melody etc.).

Clock — Set the date and time. Schedule an appointment.

Calculator — Perform 4 basic operations (add, subtract, multiply, divide).

Convert — Convert an amount into euros or another currency.

Games — Access one of the games provided.

Numbers — Program certain numbers: your number, voice mail, dialling prefix, etc.

Services — Use the functions provided by your operator (security, call forwarding, etc.)

Set up — Adjust and customise your phone.

3.7 - CHANGING THE RING TONE

From **"Audio"** in the MENU:

Select **"Ring tone"**   Confirm   Select **"Melodies"**

Confirm   Select melody

3.8 - CREATING A FILE

Access the directory   Access the options   Confirm

Enter the name   Confirm   Enter the number   Confirm
(up to 12
characters)
If you wish to use your directory abroad, store the numbers in international format with **"+".**

If your directory is empty, you will see the prompt:
"Directory empty. Create a file?":
Create by pressing the ⊙ key or decline by pressing the ⓒ key.

3.9 - READING YOUR NEW SHORT MESSAGES [1]

The ✉ icon and a beep[2] indicate that a message has been received.

Access the messages
(long keypress)

Confirm

Select the message
to be read

Confirm
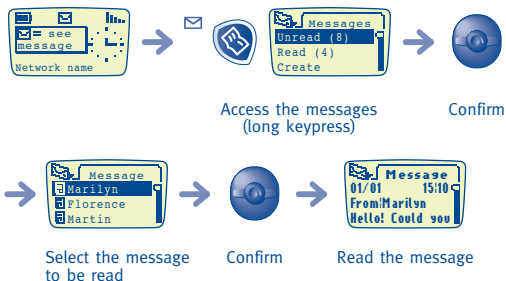

Read the message

⬤ UNREAD RECEIVED MESSAGES

The ✉ icon **disappears** as soon as you have read all the messages.

> ⚠ (1) Check the availability of this service with your operator.
> (2) To deactivate the beep, see the **"Audio/Message alert"** MENU option, page 43

4 DIRECTORY

4.1 - ACCESSING YOUR DIRECTORY

Press the 🔵 key to access the directory from the standby screen.

🔵 SEARCHING FOR A NAME BY ITS FIRST LETTER
You can also search for the name of the person you wish to contact by pressing the key associated with the first letter of their name.

Example: press the 6️⃣ key twice to find the first name beginning with "N". Then scroll the list to the name you want by using the 🔵 key.

🔵 DISPLAYING A PHONE NUMBER

Press the 🔵 directory key while the name is selected.

🔵 CALLING

Press the 🔵 key while the name is selected.

4.2 - CREATING A FILE

Access the directory   Access the options   Confirm then enter the details

4.3 - OPTIONS

From the list of names in your directory, you can access the following options by using the ⊙ key:

Create	Create a file (name and telephone number) which will be stored in your SIM card (SIM card capacity depends on your operator).
See number	Display a complete file: name and number.
Modiy number	Modify the phone number corresponding to the selected name.
Modify name	Modify the selected name.
File Number	Modify the number of the selected file.
Delete	Delete the selected file (name and phone number).
Exit	Return to the names list in the directory.

To return to the standby screen, press the Ⓒ key (long keypress).

5 CALLS

5.1 - MAKING A CALL

| Dial the number | Make the call | Talk | Hang up |
If you make a mistake, you can delete digits by pressing the Ⓒ key.

> ⚠ To enter the characters "+" or "P" (pause), make a long keypress on the ⓪+ key (the following characters scroll: **0**, **+**, **•**, **P**).

⬤ MAKING AN EMERGENCY CALL

If your telephone is within the area covered by a network, to make an emergency call, dial **112** or any other number provided by your operator.

⬤ MAKING AN INTERNATIONAL CALL

| Display the prefix "+" (long keypress) | Display list of countries | Select the country | Confirm |

Once the country code is displayed, dial the rest of the number and make the call.

5.2 - RECEIVING A CALL

Incoming call   Take the call   Talk   Hang up

If the ▓ icon is displayed, the vibrating system is enabled and no ring tone is heard.

If the ▓ icon is displayed, the vibrator and ring tone are deactivated.

> The caller's number is displayed if provided by the network (check the availability of this service with your operator).

● **SWITCHING THE RING TONE OFF** (without losing the call)

Press the Ⓒ key when the phone is ringing: you can still answer the call by pressing the 📞 key.

Pressing the Ⓒ key again rejects the call.

5.3 - DURING A CALL

⬤ AVAILABLE OPTIONS

During a call, you can use the 🔘 key to access the following options:

Call hold	Place an ongoing call on hold (you can later resume the call by pressing the 🔘 key).
Hands-free	Activate/deactivate handsfree mode (☎ symbol is then replaced by ⊂⦂⊃).

> **Caution:** move the handset away from your ear before activating this mode because the amplified volume could cause hearing damage.

Dial	Make a second call (an ongoing call will be automatically put on hold, you can switch between calls by pressing the 🔘 key).
Save Number	Store a phone number in the directory.
Messages	Read your short messages.
Services	Access the services supported by your network operator.
Exit	Return to the previous screen.

● HANDLING A SECOND INCOMING CALL

You already have a call:

Second
incoming call   Take the call   Refuse
If you press the 📞 key, the incoming call is accepted and the ongoing call is automatically put on hold: you can then swap between calls by pressing the ⊙ key.

If you press the ⊙ key, you will access other options (the incoming call is accepted by ending the ongoing call, etc.).

> ⚠ The caller's number is displayed if provided by the network (check the availability of this service with your operator).

6 CALL MEMORY

6.1 – ACCESSING AND RESENDING

Access the   Select the   Make
call memory   number   the call
Each call is identified by one of the following symbols:

📲 Answered incoming call.

✖ Unanswered incoming call.

↗ Outgoing call.

6.2 - OPTIONS

From the stored numbers list, you can access the following options by using the 🔵 key:

Save in Directory	Store the selected phone number in the directory.
Modify number	Modify the selected phone number.
Empty Call Mem.	Clear all the numbers in the call memory.
Exit	Return to the standby screen.
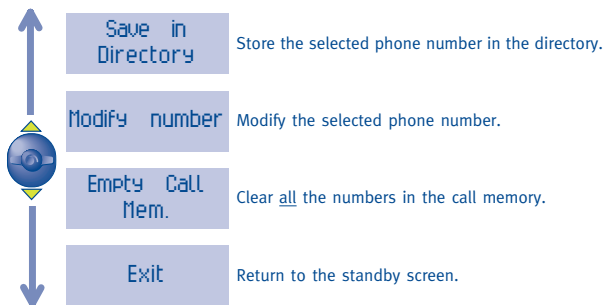

To return to the standby screen, press the 🅒 key (long keypress).

7 SHORT MESSAGES [1]

7.1 – ACCESSING SHORT MESSAGES

To access short messages (SMS) from the standby screen, make a long keypress on the ✉🖾 key.

```
Messages
Unread (8)
Read (4)
Create
```

Access short messages (SMS)
(long keypress)

The following categories appear:

Unread   Read new messages.

Read   Read old messages: already read or written.

Create   Create a new message.

Parameters   Configure parameters, especially the number of the service centre if it is not automatically suggested (you cannot send a short message without this number).

> (1) Check the availability of this service with your operator.

7.2 - READING YOUR SHORT MESSAGES

The messages are stored in your SIM card and classified in 2 categories: **unread messages and read messages.**

> The capacity of your SIM card depends on your operator. The ☒ icon is displayed when the list of stored messages is full: delete at least one message!

● UNREAD MESSAGES:
Unread received messages: see page 16.

● READ MESSAGES:
Received messages that have already been read and messages that have been written, sent or stored.

Messages may be preceded by the following symbols:

☒ Message sent and acknowledgement received.

☒ Message sent and no acknowledgement received, or message not delivered (in this case you must try to send the message again).

AVAILABLE OPTIONS:

While reading a message, you can access the following options by using the ⊙ key:

Delete	Delete the selected message.
Reply	Answer an incoming message.
Forward	Send the selected message again after modifying the recipient's name or the parameters.
Create	Create a new message.
Save number	Store the first number contained in the text of the message in the directory.
Parameters	Update the following parameters: **Service Centre**: your operator's service centre call number (may be provided automatically). **Format:** format in which the message is to be delivered to your correspondent (SMS, e-mail, fax, etc.). **Retry Duration:** time during which the network presents the message again to your recipient in case of unsuccessful delivery. **Receipt**: acknowledgement receipt request.
Exit	Return to messages list.

7.3 - COMPOSING A SHORT MESSAGE

You can create a message or supplement a (canned) stored message.

🔵 COMPOSING A MESSAGE:

To make it easier to write short messages, your phone has **an assisted data entry system** [1] (predictive data entry). To create a word, all that is needed is a single keypress on the key for any of the letters which the word contains. Example: to enter a "b", press the (2abc) key once.

> ❗ Important: the displayed letter does not always match the desired letter; the most common word is suggested. Ignore words suggested at first, searching will become more accurate as you enter more letters.

To confirm the entered word, press the 🔵 key downwards twice.

Example: you want to write "bleu":

| (2abc) | a Create à | → | (5 jkl) | a Create blĕ | → |

| (3def) | a Create blé ▪ | → | (8 tuv) | a Create bleu ▪ | → |

| 🔵 | a Create bleu ǀ | → | 🔵 | a Create bleu ▪ | |

Confirm the word (2)   Go to next word

---
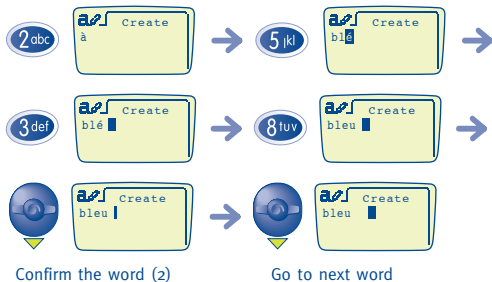

(1) Depending on your phone model and language.

(2) At this stage you can make grammatical agreements if they are not suggested (e.g. in this case add an "s" 4 successive keypresses on 7 to display "bleus" before going to the next word (cf. page 33).

The cursor shape depends on the selected entry mode:
- predictive mode █
- normal mode I

While composing the message, you can use the 🔘 key to access the following options:

Validate word	Select the current word or letter being entered.
Send the Msg.	Send the message.
Other words	Access the list of other suggested words.
Insert digits	Insert figures in the text.
Punctuation	Insert a punctuation mark or a symbol in the text.
Predictive or normal	Choose the data entry mode: predictive or normal (see page 32 "Character set").
Add word	Store a new word in your dictionary.
Exit	Return to message which is being written.

You can also use the following **shortcut keys**:

Create
bleu

Access to options

Delete

Confirm displayed word or letter (press downwards only)

Scroll the text

Space

Upper case/lower case/number

Punctuation

Other words
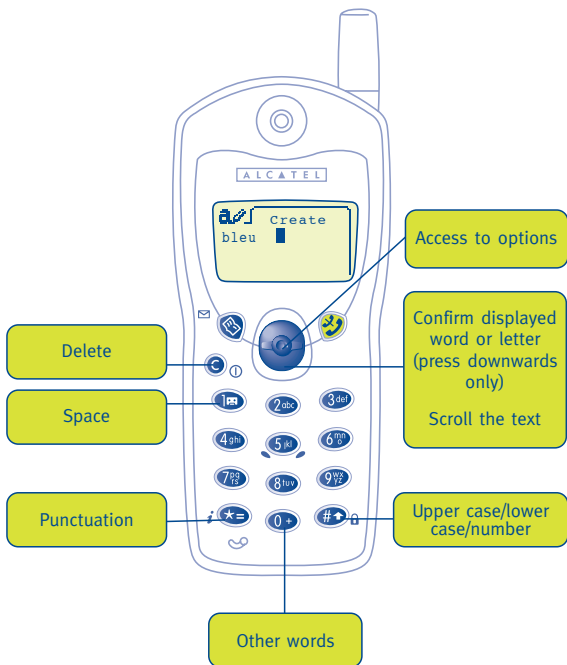

There is a dictionary in which you can add, modify or delete words. Add a word while composing a message by pressing the key and selecting the **"Add word"** option.

● SUPPLEMENTING A CANNED MESSAGE:

You can:
- Use an existing canned message.
- Create your own canned messages.

From the list of canned messages, you can use the 🔵 key to access the following options:

Validate	Use the canned message.
Create	Create a new canned message.
Modify	Modify the canned message (if it is a message which you have created).
Delete	Delete a canned message.
Exit	Exit the menu.
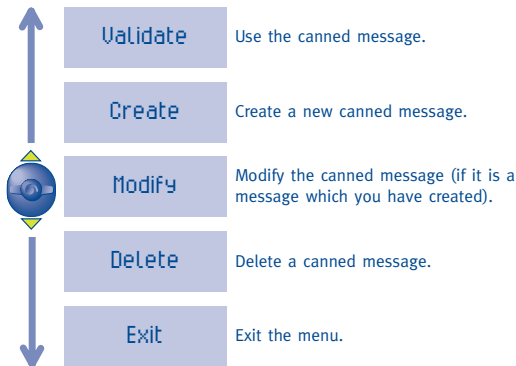

Press the Ⓒ key (long keypress) to return to the standby screen.

● CHARACTER SET

In normal data entry mode, you can access the following character set:

Key	Number of keypresses to get character											
	1	2	3	4	5	6	7	8	9	10	11	12
(1⊞)	⎵	1	_	,	'	"	:	;	?	¿	!	¡
(2abc)	A	B	C	2	Å	Ä	Æ	ç				
(3def)	D	E	F	3	É	Δ	Φ					
(4ghi)	G	H	I	4	Γ							
(5jkl)	J	K	L	5	Λ							
(6mno)	M	N	O	6	Ñ	Ö	Ω	Ø				
(7pqrs)	P	Q	R	S	7	ß	Π	Σ				
(8tuv)	T	U	V	8	ü	θ						
(9wxyz)	W	X	Y	Z	9	Ξ	Ψ					
(0+)	+	0	•	-	#	/	%	(	)	<	>	
(★=)	*	=	@	\	~	€	$	£	¥	&	§	
(#⬆)												

⎵ : space.

To enter a word, press the key which corresponds to the desired letter several times until the letter you want appears.

8 CALCULATOR

8.1 - ACCESSING THE CALCULATOR

From the standby screen, you can access the calculator in two ways.

A) Press the ⊙ key and select the **"CALCULATOR"** option.

B) Enter a digit directly via the keypad, then press the ⊙ key and select the **"CALCULATOR"** option.

8.2 - CALCULATION EXAMPLE

Key in a number → Confirm → Select the type of operation to be performed → Confirm

Enter a second number → Press → Result is displayed
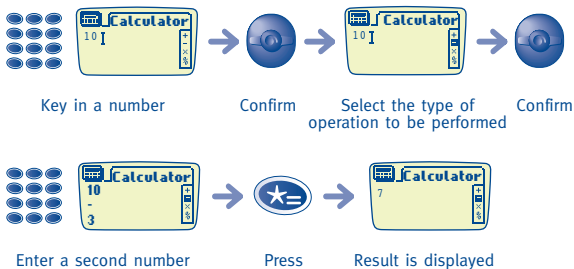

> ⚠ To enter a decimal point (**"."**), press the 0+ key (long keypress). To return to the standby screen, press the C key (long keypress).

9 CURRENCY CONVERTER

Using the currency converter, you can:
- Convert a currency directly into euros and vice versa.
- Convert an amount into another currency (e.g. convert dollars to French francs).

9.1 - ACCESSING THE CURRENCY CONVERTER

From the standby screen, you can access the currency converter in two ways:

A) Press the 🔘 key, then select the **"CONVERT"** option.

B) Enter a digit via the keypad, then press the 🔘 key and select the **"CONVERT"** option.

9.2 - CONVERSION EXAMPLE

From the **"CONVERT"** option:

Select conversion type → Confirm → Select direction → Confirm

Enter the value to be converted → Confirm → Result is displayed
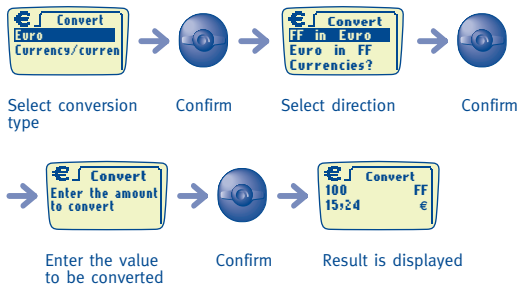

9.3 - SELECTING CURRENCIES

From the **"Currencies?"** option, access the currency table. From this table use the ⊙ key to access the following options:

Validate	Select the currency.
Add	Add a new currency (which can subsequently be modified or cleared).
Exit	Exit the Menu.
If you are in the euro converter:
Once the currency has been selected or created, you must enter the exchange rate of the currency in euros (or confirm it if it is already shown).

If you are in the currency converter:
Having selected or created the first currency, repeat the same operation for the second currency, then enter the rate for exchanging these 2 currencies.

> ! To return to the standby screen, press the Ⓒ key.

There are 3 games:

⬤ **PUZZLE:**

The aim is to redraw the original image as quickly as possible. To do this, move the squares by pressing the ②abc , ④ghi , ⑥mn and ⑧tuv keys.

⬤ **MUSIC:**

The aim is to reproduce the musical sequence played by your phone. To do this, press phone keys ①⌨ to ⑦pqrs .

⬤ **SECRET:**

The aim is to find the secret number combination generated by the phone. Once you have entered and confirmed your combination, you are given the following information:

- Correct numbers in the right place: ex. ▪ 2

- Correct numbers in the wrong place: ex. ▪ 3

10.1 - ACCESSING GAMES

Access the MENU from the standby screen

Select the **"Games"** option

Confirm

Games
Puzzle
Music
Secret

Select the
desired game

Puzzle
New Game
Go on
Level

Confirm
10.2 - OPTIONS

During a game, press the ⊙ key to access the following options:

Save — Save the game or stage of the game that you have reached.

Help — Display the rules of the current game.

Exit — Return to the game to finish it.

Quit — Quit the game and return to the list of games.
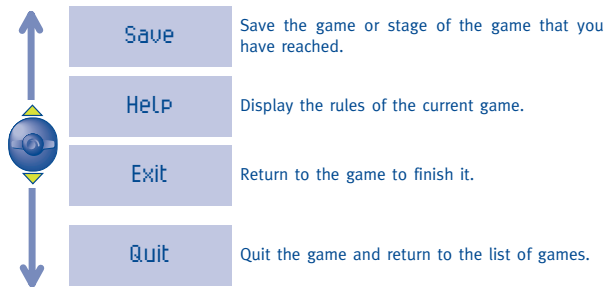

To return to the standby screen, press the © key (long keypress).

11 CREATING MELODIES

11.1 - ACCESSING THE "MELODY" MENU

From the **"Ring tones"** option, you can create two tunes which the phone plays (**"My melody"**).

Select the
"Melodies" option

Select the **"My melody"** option

Select the **"Modify melody"** option

11.2 - COMPOSING A MELODY

To compose your melody, use the keypad as shown below:

Primary notes of an octave (doh, ray, me, fah, soh, lah, te)

Change duration (short, normal, long)

Change octave

Add silent pause

Add a sharp
11.3 - OPTIONS

While you are composing your tune, use the ⊙ key to access the following options:

Record	Save your tune.
Last notes	Listen to the last five notes.
Listen all	Listen to the entire melody.
Tempo	Choose the tempo: allegro, andante, lento.
Delete	Delete the selected melody.
Exit	Return to list of melodies.
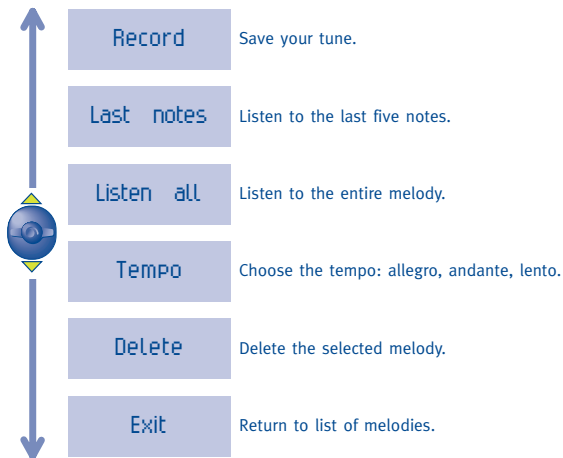

> ! To return to the standby screen, press the © key (long keypress).

12 MOBILE INTERNET[1]

12.1 - HOW TO ACCESS THE INTERNET SERVICES[2]

Access the internet services **from the standby screen** by pressing the ⊙ key, then select "**Services**" from the menu.

When you use the telephone for the first time, you'll be asked to enter your phone number using the international format.

12.2 - KEYPAD LAYOUT

Up/down scrolling in the screen

Move cursor left/right in an edit screen

Access to the available options

Return to the previous page (short press)

Return to standby screen (long press)

Deletes characters in edit screen

Confirm (short press)
Access to the available options (long press)

Send a call

1 to 9 keys: Access to items listed on the screen (short press)

Access to bookmarks added by numbers[2] (long press)

(1) Depending on the telephone.
(2) Available if provided by the network

12.3 - AVAILABLE OPTIONS

When you have accessed the Web pages, press and the following options are available to you:

...	Can be accessed from the current page.
Help	Display on line help messages.
Bookmark	The current page may be added to your bookmarks (1).
Home page	Go back to the homepage directly.
Alert List	Access a list of alerts (1).
Connect. status	Display the icon bar during an internet session.
Exit Internet	Stop viewing the services provided.
Quit	Close the contextual menu and go back to the current page.

12.4 - INFORMATION LINE

This information line is displayed as soon as you are connected to the Net, or when you access a new page or when an alert is displayed.

One message is waiting in your outbox	There is an incoming alert	The current connection is not encrypted	Access time	Animation for data transmission and reception

(1) Available if provided by the network

13 MENU

13.1 - CUSTOMISING YOUR MENU

You can make the options that you use most frequently more accessible (up to 9).
For example, if you want to place the **"Clock/Appointment"** option before the **"Audio"** option in the menu: select this option and press (long keypress) to place it in first position.

The ▪ icon appears after the **"Clock/Appointment"** option.

When you access the MENU again, it now looks as follows:

Appointment
Audio
Clock
Calculator
Convert
Games
Numbers
Services
Set up

To cancel repositioning, select the option and press (long keypress)
The procedure is the same to demote or promote **any other MENU option:** press (long keypress) to place it in 2nd position, press (long keypress) to place it in 3rd position, etc.

13.2 - AUDIO

MODE	Depends on the model and the connected accessory:
Normal	Normal ring tone (incremental).
Discreet	Normal ring tone (incremental) preceded by vibrating system.
Vibrator	No sound is emitted (ring tone, message or appointment beep, battery low) but the vibrating system is activated. The 📳 icon is displayed.
Silent	No sound is emitted and the vibrator is deactivated. The 🔇 icon is displayed.

RING TONE	
Melodies	Melodies (use 🔘 to select and press 🔘 to confirm).
Volume	Volume of the ring tone (use the volume control key 🔘 to adjust it).

KEY BEEPS	
Short press	Activates/cancels the beep sound with every short keypress.
Long press	Activates/cancels beep sound with every long keypress.

MESSAGE ALERT

Activates/cancels the beep indicating an incoming short message.

13.3 - CLOCK

Set the time and date of your phone.

APPOINTMENT

Scheduling an appointment (enter the date and time - confirm by - enter the subject of the appointment - confirm by) and confirm daily activation. As soon as this function is activated, the icon is displayed. Only one appointment can be scheduled at a time. The alarm will sound whether the phone is on or off, pressing any key will switch the alarm off. When this option is activated, deactivation is automatically proposed.

FORMAT

Date and time display format.

UPDATE [1]

Depending on your phone model and the chosen option, the date and time of your phone will be updated by the network:

Automatic   Without any action on your part.

Manual   After you have accepted an update.

None   No updating is possible apart from updating produced by the **"Clock/Time/Date"** option.

[1] Check the availability of this service with your operator.

13.4 - NUMBERS

YOUR NUMBER

Display your telephone number, usually stored in the SIM card (enter the number - confirm by pressing).

VOICEMAIL [1]

Voice mail number (enter the number - confirm by pressing).

KEYPAD

Direct dial numbers: these numbers, once entered, can be dialled <u>from the standby screen only</u> by a long keypress on keys **"2"** to **"9"**.

If no numbers are stored:

Create Enter the key number!	→		→	Create Enter the number	→	
Enter the key No.		Confirm		Enter the number (2)		Confirm

→ | Create Enter the key name! | → | |

Enter the name (2)   Confirm
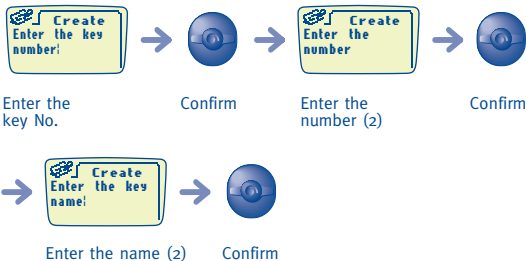

(1) Contact your operator, if necessary, before first use.
(2) If you make a mistake, you can erase a character by pressing the Ⓒ key (short keypress).

45

If a number is stored:

Select the key to be modified → Access the options → Update the selected key
Activates/cancels the prefix which will be added automatically in front of the phone number entered when making the call (enter the number - confirm by pressing).

13.5 - SERVICES

Change	If the **"Exc. FDN"** option is activated, you can update the **"FDN"** directory after entering the PIN2 code (update **"FDN"** directory by).
Incoming	Activates/cancels incoming call barring. This option is applicable in the following cases:
Except Dir.	<u>All</u> calls from a number not stored in the phone's directory are barred.
All [(1)]	<u>All</u> incoming calls are barred.
If abroad [(1)]	Incoming calls are barred if you are abroad.
Activated	List of call barring operations activated.

(1) Check the availability of this service with your operator.

NETWORKS

SMS CB [1]   Messages broadcast over the network (weather, traffic, etc.) are automatically displayed on the standby screen.

CB codes list   List of network codes used to monitor the broadcast messages.

Reception   Depending on the selected option, the phone displays broadcast messages.

   Full: The phone permanently scans the network and displays received messages in accordance with your list (see **"CB list"** option).

   Limited: Phone intermittently scans the network and displays certain messages in accordance with your list (see **"CB list"** option).

   None: The phone receives no message.

Searching   Search for a home network.

Available   Networks available in the radio environment.

Search Mode   Depending on the selected option, search mode is:

   Automatic: First searched network is the last one used.

   Manual: User chooses the home network.

[1] Check the availability of this service with your operator.

| Preferred | List of networks for priority connection (update this list by). |
| Forbidden | List of forbidden networks (update the list by). |

13.6 - SET UP

LANGUAGES [1]

Message display language (use to select it). **"Automatic"** option selects the language which corresponds to the subscription network (if available in the terminal).

DICTIONNARY

There is a dictionary to which you can add your own words to those in the data entry help system. When you consult your dictionary you can add, modify or delete words using the options available when using the key.

WELCOME MSG. [1]

A welcome message is displayed every time the phone is switched on: up to 4 lines of text are available for this message (see Character set, page 32).

[1] Option is available depending on your phone model.

DISPLAY

Backlight	Backlighting intensity (use ⊙ to adjust it): we recommend minimum intensity in order to save battery power.
Contrast	Contrast of the display (use ⊙ to adjust it).

BATT.SAVE

Power off	When this option is activated, the phone is automatically switched off if it is not used for a certain period of time (no keypress, no calls, no incoming message) chosen by the user (enter the duration - confirm by ⊙).
Keypad lock	When this option is activated, the keypad will be automatically locked (if you are not going to use your phone for a prolonged period of time).

14 WARRANTY

14.1 WARRANTY

Congratulations for choosing this mobile phone - we hope that this product will satisfy all your needs.

Notwithstanding any other applicable statutory warranties, this mobile phone (and the battery charger) are guaranteed for parts and workmanship for a period of ONE (1) year from the date of purchase shown on your invoice.
Nevertheless, if the statutory warranty in force in your country exceeds one (1) year, the statutory warranty will apply in place of the manufacturer's warranty.

Under the terms of this warranty, you must inform your dealer or any maintenance centre (see list of maintenance centres at our website - www.alcatel.com) without delay of any defect and present the invoice given to you at the time of purchase.
The manufacturer or dealer reserves the right to deny service under this warranty in respect of any equipment on which markings or serial numbers have been removed or altered.

The dealer will decide whether to replace or repair, as appropriate, all or any part of the equipment found to be defective. This warranty covers the cost of parts and labour but excludes any other costs.

Servicing under the terms of this warranty, especially repair, modification or replacement of parts shall not extend the warranty period unless there are statutory provisions to the contrary. Repair or replacement may be carried out using reconditioned components offering equivalent functionality. All defective parts replaced under the terms of this warranty will become the manufacturer's property.

This warranty shall not apply to damage or defects caused by:

- Misuse or improper use, including but not exhaustively (a) use of the equipment for a purpose other than that for which it was designed or not in conformity with the manufacturer's or dealer's instructions regarding the use and maintenance of the equipment and (b) installation or use of the equipment not in conformity with applicable technical and safety standards in the country where the equipment is used;

- Accidents, force majeure or any other external cause outside the equipment, especially the consequences of theft, acts of vandalism, lightning, fire, humidity, ingress of liquid, atmospheric influences, RF interference produced by other equipment, fluctuations in mains voltage and/or voltages on telephone lines, etc.;

- Combination or integration of the equipment in hardware not supplied by the manufacturer or dealer unless the latter gave written, explicit consent for such;

- Defects and deterioration caused by normal wear;

- Modifications or alterations made to the equipment even if they are mandatory due to changes in regulations and/or modification of network parameters;

- Connection faults resulting from unsatisfactory radio propagation or caused by the absence of radio relay coverage.

Apart from the statutory warranty, the above provisions constitute the only claims which can be made against the manufacturer and dealer on the grounds of equipment defects, this warranty excluding any other explicit or implied warranty associated with sale of the equipment.

14.2 INFORMATION

- Web site: www.alcatel.com
- Alcatel hotline No.: see "Alcatel Services" leaflet (calls charged at applicable local rate in your country).

Your telephone is designed to emit and receive calls. It operates on GSM networks with 900 MHz and 1800 MHz bands.

Guarantee for batteries and accessories other than battery charger

Notwithstanding any other applicable statutory warranty, the battery of your phone and accessories other than the battery charger are guaranteed for a period of 3 months from the date of purchase shown on your invoice. Nevertheless, if the statutory warranty in force in your country exceeds 3 months, the statutory warranty will apply in place of the manufacturer's warranty.

In case of defect, return the battery to your dealer for replacement.

This warranty shall not, however, apply in the case of use not conforming with the instructions in the User's Guide, damage due to external causes or repairs or modifications carried out by parties not authorised by the manufacturer or dealer.

Unless there are statutory provisions to the contrary, batteries and accessories that are replaced under the terms of this warranty shall not be covered by any specific warranty extending beyond the initial warranty period.

The CE mark indicates that your telephone and battery comply with applicable EC directives, namely:
- directive 73/23/EEC (electrical safety)
- directive 89/336/EEC (electromagnetic compatibility)
- directive 1999/5/EEC (R&TTE)

15 ACCESSORIES

New Alcatel GSM phones have a handsfree feature so that you can hear and talk using the phone when it is located a certain distance away from you, e.g. placed on a desk. For those who wish to maintain the privacy of their conversations, a combined earphone and microphone is available as an accessory: the headset.
