- The use of incompatible SIM cards, manually cut SIM cards, or SIM card adapters may damage the cards or the device, and it may corrupt the data stored on the cards.
- Scratching or bending of the SIM cards may result in the loss of contacts and information, so be careful when handling, inserting, or removing the cards.

Frequent writing and erasing of data shortens the lifespan of memory cards.

Charge the battery

A new battery is partially charged. The battery icon at the upper-right corner shows the level of charging status.

1. Plug the small end of the charger into the micro USB port of the device, and plug the large end of the charger into an electric socket.
2. After being fully charged, disconnect the device from the charger. First unplug the charger from the device, and then unplug it from the electric socket.

Always use authentic accessories to optimise your battery performance.
Non-authentic accessories (eg. chargers) can damage your battery and even your phone.

Optimise your battery performance

Here are some tips to help you optimise your battery performance.

- Always ensure that your phone profile is appropriately set to meet your actual usage.
- If you are not using Bluetooth, Wi-Fi, GPS or other applications, turn them off.
- Adjust the intensity of your display screen's backlight to low or medium level and for the shortest duration.
- Avoid using or placing your phone near magnetic objects (eg. a radio or television) or on metal surfaces, which will impact the network connection and ultimately drain power from your battery.
